

Canterbury Powerflue in Platinum shown (CANTIB-PDEEP). Also available as a Fitzroy model.

What sets Cannon **Powerflue** heaters apart?

The many benefits of a Cannon Powerflue Gas Log Heater:

- + Efficiency Rating: 5.5 stars for units with 400mm long flue
- + Draws air from outside for combustion
- + Combustion products are expelled to atmosphere with the assistance of a combustion fan
- + Room sealed heater, means that combustion products can't return into the room
- + Room air is not depleted from the living environment
- + Cleaner and safer source of heating
- + Higher efficiency rating due to additional heat exchanger and improved combustion process
- + Flexible installation options
- + Can flue up to 6 metres maximum vertical, sideways or under floor
- + An extended flue kit is available as an accessory – Product Accessory Code: FLUEWFX
- + Can be installed in chimneys where integrity of chimney may be an issue
- + No need for zero clearance box
- + Mock kit supplied as standard
- + Heater can penetrate through external wall and be concealed with a weatherproof box

Standard flue vs. Powerflue

Standard heater operation

Flue goes directly through the ceiling and roof.

Powerflue operation

Air is drawn in from outside for combustion via the air inlet and vented outside via the flue outlet.

Flexible Installation Options

1 Horizontal installation from the back.

2 Vertical installation.

3 Under floor installation.

4 Sideways horizontal installation.
